## SUMMARY

Dedicated and results-driven Software Engineer with 3.5 years of experience at Tata Consultancy Services Ltd. A Computer Science Engineer by education, with proven expertise in production support (Unix, Hadoop, SQL) for 2 years and a strong focus on software development over the past 1.5 years, utilizing modern technologies such as Node.js, Python, and React.js. Adept at solving complex technical challenges and delivering high-quality solutions in dynamic environments. Actively seeking a developer role to leverage technical expertise and contribute to innovative projects.

## EDUCATION

### Bachelor of Engineering

Computer Science and Engineering  
Shri Shankaracharya Engineering College  
(08/2017 - 05/2021)

### Higher Secondary School (CBSE)

BSP Senior Secondary School  
(04/2015 - 06/2017)

### Senior Secondary School(CBSE)

BSP Senior Secondary School  
(04/2013 - 06/2015)

## SKILLS

- Proven ability to stay composed and make sound decisions under pressure.
- Excellent teamwork, interpersonal, and presentation skills.
- Successfully built and maintained strong cross-functional relationships.
- Self-motivated with the capability to work independently and take initiative.
- Quick learner with the aptitude to grasp and apply new technologies efficiently.

## COMPETENCIES

- |            |                  |              |              |
|------------|------------------|--------------|--------------|
| • Node JS  | • Dash Framework | • REST API's | • MySQL      |
| • React JS | • Javascript     | • Unix       | • ServiceNow |
| • Python   | • HTML5 , CSS3   | • Hadoop     | • Git        |

## PROFESSIONAL EXPERIENCE

### Tata Consultancy Services

July 2023 - Present

#### Client : Molson Coors

In this project, I have been working as a Software Developer for the past 1.5 years, leveraging technologies such as Node.js, React.js, and Python. My primary contribution was the development of a Pricing Simulator, a critical tool for the client's Sales team to enhance business growth. This tool provides actionable insights by analyzing various factors that influence Key Performance Indicators (KPIs), enabling the team to make data-driven decisions. The project involved a complete lifecycle from ideation and design to development, testing, and deployment, showcasing my ability to deliver end-to-end solutions that drive measurable impact.

#### Role :

- Analyzed and comprehended project requirements to deliver precise solutions.
- Conceptualized, planned, and developed the Pricing Simulator from start to finish.
- Conducted end-to-end testing to resolve issues and ensure high-quality deliverables.
- Successfully deployed the application to the server after thorough testing.
- Created detailed project documentation and conducted demonstrations for end-user teams.
- Currently working on implementing new features to enhance the product's functionality and value.

Tools Used : VS Code, GitHub, Dash Framework

**Client : Barclays PLC**

The project served a Barclays Banking domain client, where I contributed as a System Engineer. My role involved coordinating with network, server, and database teams to identify root causes during major incidents. I also acted as the Subject Matter Expert (SME) for the application within the team, ensuring smooth understanding, management, and development of the system. Additionally, I played a key role in successfully transitioning the project from the Development phase to the Support team.

**Role :**

- Analyzed and comprehended project requirements to deliver precise solutions.
- Handled Incident and Change Management tasks efficiently using ServiceNow.
- Planned and executed quarterly deployments seamlessly.
- Designed and automated manual processes to improve efficiency and reduce effort.
- Created detailed documentation, instructional videos, and process pages to facilitate smooth transitions for new associates.
- Troubleshoot and managed the production environment, ensuring performance and system stability.

**Tools Used : Tivoli Workload Scheduler(TWS), Teamcity, Nolio, MSSQL, Putty, QlikView, SAS Applications**
